INTRODUCTION

ProcureAZ is the State's central procurement system; it supports—among other functions—bidding, vendor registration and the initiation of vendor payments through its integration with AFIS.

Those with an appropriate user role and authority can initiate vendor payments in ProcureAZ.

Because procurement and payment involve different types of internal control issues, security for these processes is handled by different organizations. Security related to most procurement functions is administered by SPO or an agency to which SPO has granted appropriate authority; security related to payment functions is administered by GAO Security.

This section of SAM sets forth the policies and procedures necessary to acquire the ability to initiate and/or approve payments within ProcureAZ.

POLICIES

1. Security for ProcureAZ functions other than those related to the initiation or approval of payments is administered by SPO or by an agency to which SPO has granted appropriate authority.
2. Security for ProcureAZ function related to the initiation or approval of payments is administered by GAO Security.
3. The specific functions in ProcureAZ related to the initiation or approval of payments are:
 - 3.1. The AP User role, which enables a user to initiate payments to a vendor.
 - 3.2. The AP Supervisor privilege, which enables an AP User to approve payments to a vendor.
4. A payment can be neither initiated nor approved unless the following conditions have been met:
 - 4.1. The relevant purchase order has been approved in ProcureAZ.

Accounts Payable in ProcureAZ

- 4.2. The relevant purchase order has been transmitted to a vendor (i.e., the status of the purchase order in ProcureAZ shows "sent").
- 4.3. A receipt, relevant to the transaction, has been recorded in ProcureAZ for an amount greater than or equal to the amount of payment being initiated or approved.
5. Approved payment data will be transmitted from ProcureAZ to AFIS. AFIS will subsequently issue a payment to a vendor, provided that other conditions necessary to effect a disbursement (sufficient cash and spending authority, etc.) have been met.
6. To request the role of AP User or AP Supervisor privileges, a properly completed Form GAO-96PAZ must be forwarded to GAO Security; the Form GAO-96PAZ is available on the GAO Website at <https://gao.az.gov/publications/forms>.
- 6.1. Before the role of either AP User or AP Supervisor may be granted, the user must have a valid ProcureAZ Login ID and Password. ProcureAZ Login IDs and Passwords are issued by SPO or an agency to which SPO has granted appropriate authority.
- 6.2. A User's ProcureAZ Login ID is typically his State of Arizona work email address.
7. Once the role of AP User has been granted, an applicant will lose all other roles and privileges except that of Inquiry.
8. Calls concerning this policy may be directed, as appropriate, to:
 - 8.1. ProcureAZ Helpline: 602.542.7600, procure@azdoa.gov.
 - 8.2. GAO Security: 602.542.5600, gaosecurity@azdoa.gov.
