MODIFY A VENDOR IN AFIS

Overview
This QRG is for Department users who need to make changes to a non-APP Vendor/Supplier in AFIS.

AFIS maintains a single Vendor/Customer (VCUST) table for both Vendors (i.e. entities getting paid by the State for goods or services) and Customers (e.g. entities paying the State for their share of work done by the State). A single entity can be Active as a Vendor, a Customer, or both.

An agency may decide to modify a Vendor/Customer record for one of the following actions:

1. Add a new address for a Vendor/Customer
2. Correct an error on an existing Vendor/Customer address
3. Add or update contact information
4. Add or update Organizational information
5. Activate a Vendor

Vendor Code Numbering

- IV* from APP
- VC* entered in AFIS
- VC* from Legacy AFIS
- PZ* from Legacy ProcureAZ
- 99999999 from AHCCCS
- XXX99999 from ICA

Use the Vendor/Customer Modification (VCMD1) document to make these changes unless the Vendor is from APP (Code starts with IV*). **APP Vendors must be modified in AFIS, by the Vendor or GAO/SPO Vendor Administrator.**

For other changes, such as updating Legal Name or TIN, contact GAO and provide a substitute W9 form version dated 10/2018 or greater.

The following steps will help guide you through modifying a Vendor/Customer record in AFIS.
Locate an Existing Vendor in AFIS

Some vendors have multiple Vendor/Customer records. Follow the steps below to review all existing records for a Vendor Name or Taxpayer ID Number. Log into AFIS. Navigate to Vendor/Customer (VCUST), where all Vendors and Customers are stored.

Navigate to Vendor/Customer (VCUST)

In the Jump to field, enter VCUST. Click Go. The VCUST table opens Click on the underlined Search option and a Search popup window will display.

Search for a matching Vendor record.

1. In the Search window, enter Taxpayer ID Number (TIN), Vendor/Customer, Legal Name, or other search values. If you know the TIN, use it for the best match. Otherwise, use the “wildcard” (*) to search with a partial string of the Vendor’s name.

2. Click Ok. The Vendor/Customer table displays any records matching the search criteria.

If there is a matching result, identify whether the Vendor is Active and has the correct Address.

1. In the Vendor/Customer component, review the General Information area

- If Vendor Active Status is Active and Vendor Approval Status is Complete, then this vendor is available for use.
- If Vendor Active Status is Inactive or Vendor Approval Status is Incomplete, you will need to activate the Vendor with a VCMD1.
2. At the **Address** component, check the addresses that exist for this vendor.

   At the **Authorized Dept** component, check that the vendor is NOT restricted to a certain department. Any restrictions are listed here.

   ![Image of Address and Authorized Dept components]

   If no results match (that is, your Vendor is not on VCUST), refer to **Create a Vendor in AFIS QRG.**
Modify a Vendor

Create a VCMD1 document from the Vendor/Customer record. At the Vendor/Customer component, select the Vendor record.

1. At the bottom of VCUST, click Modify Existing Record
2. In the Create Document window, enter VCMD1 as the Document Code
3. Enter your Department code as the Document Department
4. Check the Auto Numbering box
5. Click Create Document to open the VCMD1

Complete the Header component.
   1. Enter a Document Description
   2. Click Validate. (If it disappears later, re-enter it and immediately Validate)

Continue to the sections below to Error! Reference source not found., Error! Reference source not found., or Error! Reference source not found.. Use the Document Navigator on the left side of the screen to move through components of the Document.

Activate a Vendor

Complete the Certification component to activate the Vendor for use.

1. In the Document Navigator, click Certification
2. If the Certification line is not showing, click Insert New Line. Click Load Values
3. Change Vendor Active Status to Active

Attach the W-9 and any other pertinent documentation to the Header component. (See Getting Started with AFIS Training Guide for help with attaching documents.)
Add a New Address

An Address ID represents a particular location or PO Box. Each address should only exist once as a Master Address for a Vendor/Customer, although it may be reused as Ordering, Payment, and Billing Address.

- To make minor corrections for spelling or updating Zip Codes, use Modify Existing Address.
- If a Vendor has moved to a new location, use Add New Address.
- Verify if Main 1099 address needs to be updated as well.

Always be certain when using Modify Existing Address that the old address information is incorrect. There is a risk that another Department may have a Purchase Order out to the Vendor using the Address you are considering modifying.

Complete the Address Information component.

1. In the Document Navigator, click Address Information
2. Click Insert New Line
3. Select New from the Line Action drop down menu
4. On the Add New Address tab, select the New Address Type (e.g. Payment)
5. Check the Auto-Generate box
6. Click Save to generate the New Address ID, and make a note of it for later entry

1. On the Address Information tab, enter Street 1, Street 2 (optional), City, State/Province, Zip/Postal Code, and Phone (optional but preferred).
Add Country if other than USA. Leave other fields blank; contact your GAO liaison if you have questions about their use

2. If you are using an existing Contact, select the Principal Contact ID. If you have new contact information, enter it at the Contact Information tab.

3. Check the Auto Generate box to create a Principal Contact ID, and fill in the Principal Contact, Title/Role, Email, Phone, Phone Extension and Fax fields for whatever information you have.

If you are adding a new Contact (at the Contact Address Information tab),

1. Enter the Street 1, Street 2 (optional), City, State/Province, Zip/Postal Code and Country if you have it.

At the Contact Address Information tab, the Contact will inherit the Address from the Address Information tab if you do not enter a separate Address.

1. Click Validate to generate the new Address ID and Principal Contact ID (if new)
If you are using the same address for other Address Types, that you just added the new address for Payment and now you want to use the same one for Ordering and Billing, continue with the next steps to copy the Payment Address for re-use.

1. Click the Copy Line icon for the Payment Address line
2. Click Insert Copied Line at the bottom of the screen to create a new line with the information from Payment Address
3. Change the Address Type (i.e. to Ordering or Billing)
4. Click Save

Check the grid to see that the Address ID is the same for both lines. If you did not Validate before copying the first Address, both lines will create separate Address IDs. Avoid adding multiple Address IDs for the same address.

If the Vendor is also a Customer, repeat steps to copy an address or steps to create a new address; set Address Type to Billing.
Modify a Master Address

If a vendor sends you a change of address notification, you should add it as a new Address rather than modifying an existing Address. If there is a mistake in an address, such as transposed address number or a new Zip Code has been assigned, you should modify the Address.

Complete the Master Address component

1. In the Document Navigator, click Master Address
2. Click Insert New Line
3. Select Modify from the Line Action drop down menu
4. On the Modify Existing Master Address tab, select the Address ID from the Pick List

On the Address Information tab

1. Update Street 1, Street 2 (optional), City, State/Province, Zip/Postal Code, Phone, and/or Country fields as needed depending upon what you’re modifying.

Leave other fields blank; contact your GAO liaison if you have questions about their use

2. Click Validate to generate the new Address ID

If needed, use Copy Line and Insert Copied Line to create matching Payment, Ordering, or Billing Addresses.
Add or Modify 1099 Reporting Information

If the vendor’s location has changed or you have verified that the Main 1099 address needs to be updated, continue with the next steps to update the 1099 Reporting Information Tab which ties to the 1099i table.

**In the Document Navigator**

1. Click **1099 Reporting Information**
2. Click **Insert New Line**
3. Select **Modify** from the Line Action drop down menu
4. On the **Modify Existing Taxpayer** tab and enter the **current TIN** in the Taxpayer ID field after choosing the pick list (tree icon) and select the correct result
5. The **Existing Taxpayer ID Number Type** and **Existing Detailed TIN Type** will auto fill
6. Click **Save**

**On the Taxpayer Information tab**

1. Enter the **new address** as shown on the **W-9 under Main Address**
Add or Modify a Contact

If Contact information has changed for a Vendor, you can add a new Contact (if it is a new person filling a role), or you can modify an Existing Contact (if the Contact’s Title, Phone, Fax, or Email information has changed).

Complete the Contacts component to Add or Modify a Contact

1. In the Document Navigator, click Contacts
2. Click Insert New Line
3. Select Modify from the Line Action drop down menu
4. On the Modify Existing Contact tab, select the Contact ID from the Pick List.
5. At the Contact Information tab, enter changes to Title/Role, Phone, Email, or Fax
6. At the Address Information tab, optionally select an existing Address for the Contact
Modify the Contact Assigned to an Address

You can change the Contact assigned to an Address at the Address Information component.

Complete the **Address Information** component

1. In the Document Navigator, click **Address Information**
2. Click **Insert New Line**
3. Select **Modify** from the **Line Action** drop down menu

On the **Modify Existing Address** tab

1. Select **Existing Address Type** from the drop down menu (i.e. **Payment**)
2. Select **Existing Address ID** from the Pick List

On the **Contact Information** tab, optionally select a different Contact

Attach, Validate and Submit

Remember to attach relevant information, such as an updated W-9 to document the changes.

Attach the W-9 and any other pertinent documentation should to the Header component. (See *Getting Started with AFIS Training Guide* for help with attaching documents.)

**Validate** the VCCD1 document.

1. Click on the **Validate** button
2. Confirm that the document validated successfully in the upper left-hand corner. If it did not, please see your accounting supervisor.

**Submit** the VCCD1 document.
Modify a Vendor

1. Click on the **Submit** button
2. Confirm that the document submitted successfully. Note that the document will be handled through workflow and will be Pending Approval

**Approval Flow, Common Reason for Rejection**

Submitted VCMD1 documents route through two workflow approvers.

- Department is the first approver
- GAO is the final approver

Some of the common reasons that GAO has rejected a VCMD1 back to the Submitter are listed to the right.

**Helpful Hints**

*Help Keep the Vendor File Clean and Accurate*

If you see errors in the vendor file, such as spelling errors or information in the wrong fields, please notify the AFIS Vendor Group by emailing [Vendors@azdoa.gov](mailto:Vendors@azdoa.gov), and include screen prints of the errors so that GAO can research and correct the issue.

**Adding vs. Modifying a Vendor Address**

Do not modify addresses unless you’re certain that the address should be changed. Many Vendor/Customers maintain multiple locations; new address information should probably be regarded as an **Add** rather than a **Modify**. We should not make changes to addresses that other state agencies may be using. If you have specific questions on how to modify a vendor record, please write to [Vendors@azdoa.gov](mailto:Vendors@azdoa.gov) or contact your GAO liaison.
Creating a Vendor from a Customer Record

If a Vendor/Customer is setup as a Customer initially and later needs to be activated as a Vendor, then a W-9 is required for the VCCD1 to activate the Customer as a Vendor in AFIS.

W-9 Requirement

Attach a W-9 to each VCCD1 document that establishes an active Vendor and each VCMD1 that modifies Vendor information.

Always check the W-9 Received box, and enter the W-9 Received Date:

1. On the Account Indicators tab of the Vendor/Customer section of the VCCD1
2. On the General Information tab in the Vendor/Customer section of the VCMD1 document.

Search First; Avoid Creating Duplicate Vendor/Customers and Addresses

Use the Search option first to see if a Vendor/Customer already exists to avoid duplicating Customers in AFIS. The clean-up effort required is substantial, and the errors that are caused by duplicate entries are not simple to fix.

Final VC* Documents do not Modify (Edit) or Cancel (Discard)

A VCCD1 or VCMD1 document that has been submitted and approved cannot be modified or cancelled. Changes require a separate VCMD1 document to modify the Vendor/Customer.

Vendor/Customers are not cancelled but they can be inactivated with the VCMD1 document.
