

 ARIZONA ACCOUNTING MANUAL	SECTION IV-B	PAGE 1	DATE 07/01/12
SUBJECT <p style="text-align: center;">COMPTROLLER REVENUE OBJECTS FY 13 CHART OF ACCOUNTS</p>			

Introduction

Revenue Comptroller Objects (COBJs) are used to record cash and non-cash receipt transactions entered into the Arizona Financial Information System (AFIS). When entering a transaction into AFIS, a COBJ is entered manually. Entering a Transaction Code (TC) systematically infers General Ledger accounts, but does not systematically infer a COBJ.

The following list of Revenue Comptroller Objects includes all active Revenue COBJs valid for use in fiscal year 2010. This list is updated annually, if necessary, to reflect changes for the current fiscal year. The list is sorted by Object Code, Comptroller Source and Group, and Comptroller Object.

Definitions

Comptroller Object: Commonly referred to as COBJ, this represents the lowest level of the General Ledger Account structure for operating statement statewide accounting purposes. It includes revenue, expenditure, transfer and statistical accounts.

Comptroller Source Group: This is used to group Comptroller Objects for reporting purposes.

General Ledger Account: This account identifies the nature of financial activities and balances. The general ledger includes balance sheet and operating accounts (Comptroller General Ledger Accounts) and operating accounts (Comptroller Object Accounts).

Object Code: The Object Code used to group Comptroller Source Groups for reporting purposes. Revenue groups are listed below.

- 4100 Taxes
- 4200 Intergovernmental Revenue
- 4300 Sales & Charges for Services, Goods & Capital
- 4400 Licenses, Permits & Fees
- 4500 Fines, Forfeitures & Penalties
- 4600 Other Revenue
- 4800 Non-Revenue Cash Receipts
- 4900 Transfers-In
